PREFACE

In accordance with the plan of cumulation adopted two years ago, the two volumes of the Industrial Arts Index, covering the years 1920 and 1921, have been combined in one alphabet and published as number ten of volume nine. It includes all the references appearing in the Industrial Arts Index since January 1920. It supplants, therefore, the 1920 annual volume as well as all the current numbers for 1921. The list of periodicals indexed is given on following pages. The periodicals recently added and not therefore indexed thru the entire two-year period are indicated by an asterisk. With the vast amount of new technical literature to be indexed it seemed unwise to go back even for the period of a year in order to index all the periodicals completely. New technical and business books have been included in the same alphabet with the periodical references, this feature having been begun in the middle of 1920. Various bibliographies from other sources than the magazines regularly indexed will also be found under their proper subject headings.

The members of the staff who are responsible for this volume include besides those mentioned on the title page, Miss May Carpenter, who has given faithful and intelligent service to the Index almost from its beginning; Miss Elsie Schonholtz, who has read the page proof for this volume; Miss Bella Traum, Mrs. Marion Scherr and Miss Marguerite Klosset, who tho recent additions to the staff, have carried on the monotonous details with patience and efficiency.
